

# THE ELECTRONIC CAREGIVER®

A Solution for Seniors

the electronic caregiver

## 24/7 Monitoring & Protection

- Industrial-grade console with 2-way communication
- Long-range emergency pendant with 1,000-foot range
- Dual-watch window inactivity detector
- Unlimited daily communication with EMT operators
- Free medication and medical appointment reminders
- Complimentary CareAdvocates service

## Seniors: Enjoy independence longer!

Be proactive about your health and independence, choose life – choose the Electronic Caregiver. Whether you live alone, with your spouse, a family member, or live in a retirement community, The Electronic Caregiver is for you. Are you on new medication? Have you fallen recently? Are you experiencing the natural effects of aging? Adults over age 65 are at an elevated risk risk of falling – don't let a fall stop you from living your life on your terms.

### Age in Place

- Our system reduces mortalities by 400%
- We automatically detect inactivity and notify your closest friends, family or neighbors
- Our EMT Direct Link button allows you to speak with a Class-B EMT, free of charge, before a health condition worsens
- Our system statistically reduces hospital re-admissions by 49 percent

### Medication Management

- We remind you to take your medication daily
- We remind you about recurring medical procedures or doctor's appointments

### Fall Protection

- We place Optional wireless emergency help buttons placed throughout your residence
- We offer a free in-home safety inspection
- We offer a free personal fall-risk assessment

Please call (915) 858-1076 to schedule an appointment or if you have additional questions.
